

# Lists

This document shows some list features. It also has the showBoundary document property set which causes a frame around each page. The rest of this paragraph is just to have more than one line. Really, it is. Don't read on here but skip to the next paragraph.

```
-----  
here is a preformatted paragraph  
-----
```

This is a normal paragraph. If inside a list, leftIndent should be like the surrounding list items, but there is no bullet or number. The rest of this paragraph is just to have more than one line. Really, it is. Don't read on here but skip to the next paragraph.

1. Lists start with beginList() and end with endList(). The rest of this paragraph is just to have more than one line. Really, it is. Don't read on here but skip to the next paragraph.
2. Each item of the list is specified using li() The rest of this paragraph is just to have more than one line. Really, it is. Don't read on here but skip to the next paragraph.

This is a normal paragraph. If inside a list, leftIndent should be like the surrounding list items, but there is no bullet or number. The rest of this paragraph is just to have more than one line. Really, it is. Don't read on here but skip to the next paragraph.

```
-----  
here is a preformatted paragraph  
-----
```

3. switching from one style of list to the other needs only a single modification at the source code: the listStyle parameter of beginList(). endList() does not take any parameter The rest of this paragraph is just to have more than one line. Really, it is. Don't read on here but skip to the next paragraph.
4. Currently defined liststyles are UL and OL. The rest of this paragraph is just to have more than one line. Really, it is. Don't read on here but skip to the next paragraph.

1. This is now the first item in a nested list. The rest of this paragraph is just to have more than one line. Really, it is. Don't read on here but skip to the next paragraph.

This is a normal paragraph. If inside a list, leftIndent should be like the surrounding list items, but there is no bullet or number. The rest of this paragraph is just to have more than one line. Really, it is. Don't read on here but skip to the next paragraph.
